

Recommendation to admit Morteza Abdipour to licenciate studies

We have received an application (attached) from Morteza Abdipour for licenciate studies at UID, in collaboration with Mittuniversitetet (MIUN) where he would be based and employed. This follows negotiations between Maria Göransdotter and Johan Redström on behalf of UID and Lena Lorentzen and Stefan Pettersson on behalf of MIUN regarding the details of the agreement for this collaboration. The position would be funded by MIUN, while the education would be provided by UID. Erik Stolterman would serve as supervisor at UID, and he and Morteza have already begun a conversation about his research plan for the first ISP.

After consultation with Erik Stolterman, I recommend, as director of PhD studies, that Morteza Abdipour be admitted to licenciate studies at UID.
